

This is an outrage!! We deserve to have our rights to hear weather and traffic on our payed XM service. It takes multiple givers of this information to end with quality and it promotes competitive services. You are taking away our first amendment rights by not allowing XM to broadcast the weather and traffic on the xm service. And if you start taking away our rights, WE WILL REVOLT!!!!!! It is stated in the Constitution that we are allowed to have these rights and no-one will ever take that away!!!

P.S. I do not think James Madison or Alexander Hamilton would be proud of what you are doing to their constitution.
